

Bhavana S

📍 Mysuru, Karnataka

Education

The National Institute of Engineering (NIE North)

Expected: June 2027

Bachelor of Engineering in Information Science and Engineering

Technical Skills

- **Languages:** Python, JavaScript, C++
- **Frontend:** React.js, Next.js, HTML5, CSS3, Responsive Web Design
- **Backend:** FastAPI, REST APIs, API Integration
- **Databases:** MongoDB, Firebase, SQL
- **AI/ML:** Machine Learning, Large Language Models (LLMs), Google Gemini API, Prompt Engineering, Speech-to-Text
- **Cloud & APIs:** LiveKit, Google OAuth, REST APIs
- **Developer Tools:** Git, GitHub, VS Code, Google Colab
- **Core Subjects:** Data Structures & Algorithms, OOP, DBMS, Computer Networks, Operating Systems

Projects

I'm On It – AI Meeting Execution Platform (Ongoing)

[GitHub](#) | [Live Demo](#)

- Integrated LiveKit for real-time meetings, Speech-to-Text transcription, and Google's Gemini API to generate meeting summaries, action items, assignees, and deadlines automatically.
- Designed a manager approval workflow with automated email notifications and proof-of-work verification using screenshots and Google Drive links.
- Built secure authentication with Google OAuth and a scalable backend using FastAPI and MongoDB.
- **Tech Stack:** Next.js, FastAPI, Python, Gemini API, LiveKit, MongoDB, Google OAuth, REST APIs

Beacon Executive Intelligence for Business Growth

[GitHub](#) | [Live Demo](#)

- Built an AI-powered executive assistant that transforms Excel/CSV business data into strategic insights, AI-generated executive summaries.
- Developed an end-to-end platform using FastAPI, React.js, Pandas, MongoDB, and Google's Gemini API with secure REST APIs for file upload, analysis, and conversational querying.
- Engineered a context-aware AI chat system enabling executives to ask natural-language questions grounded in uploaded business reports while solving production challenges including Pandas JSON serialization and CORS deployment.
- **Tech Stack:** Python, FastAPI, React.js, Pandas, MongoDB, Gemini API, REST APIs

Tomato Disease Detector

[GitHub](#) | [Live Demo](#)

- Built an end-to-end tomato leaf disease detection system using Machine Learning and Kaggle datasets.
- Designed REST APIs with FastAPI and integrated them with a React.js frontend for real-time disease prediction.
- **Tech Stack:** Python, FastAPI, React.js, Machine Learning, Google Colab

Achievements & Interests

- Building AI-powered products focused on workflow automation and intelligent user experiences.
- Exploring Large Language Models, Agentic AI Systems, Machine Learning, and scalable Full-Stack Development.
- Actively contribute to personal projects using Git and GitHub while continuously improving Data Structures & Algorithms.
